# AI CERTIFIED LEAN SIX SIGMA GREEN BELT (AI - CLSSGB)

## INTRODUCTION

There is a growing global demand for skilled professionals who are certified in **Lean Six Sigma Green Belt** methodologies and possess the expertise to optimize business processes using business process re-engineering techniques.

Recognizing this need, IMRTC, as a leading and reputable consortium, has developed a comprehensive curriculum that integrates Lean Six Sigma Green Belt principles with **emerging Artificial Intelligence (AI) technologies**. Through extensive consultation with senior members, industry executives, and expert consultants, IMRTC has introduced the advanced certification program: **AI-CERTIFIED LEAN SIX SIGMA GREEN BELT (AI-CLSSGB)**. This program equips professionals with the tools, techniques, and AI-driven methodologies required to drive process efficiency, quality improvement, and operational excellence in modern organizations.

This program equips professionals with the tools, techniques, and AI-driven methodologies required to drive process efficiency, quality improvement, and operational excellence in modern organizations.

## ABOUT AI - CLSSGB

The **AI Lean Six Sigma Green Belt (AI-CLSSGB)** certification is designed to develop essential expertise and practical skills for professionals in **Quality, Production, Operations, and Service** domains.

The primary objective of this program is to enable management and teams to increase organizational productivity, reduce costs, and optimize processes by combining Lean methodologies with **advanced Artificial Intelligence (AI) technologies** for more effective and efficient operations.

JOIN NOW

The AI-CLSSGB curriculum covers key areas, including:

- ✓ Quality Cycle Management
- ✓ Lean Management Principles
- ✓ Qualitative and Quantitative Assessment of Processes
- ✓ Strategic Operational Management using ERP, CRM, and AI systems
- ✓ The program adopts a systematic, hands-on learning approach, featuring:
- ✓ Practical exercises and practice sessions
- ✓ Quizzes and assessments
- ✓ Audio-visual learning aids
- ✓ Real-world case studies and project development

This comprehensive approach ensures that participants gain practical skills, applicable knowledge, and experience in implementing Lean Six Sigma methodologies enhanced by AI in real organizational contexts.

## AUDIENCE

The **AI-Certified Lean Six Sigma Green Belt (AI-CLSSGB)** program is ideal for professionals from **Quality, Production, Manufacturing, and Service** industries who wish to enhance their skills in process optimization and operational excellence.

It is particularly suitable for:

- Managers
- Supervisors
- Executive Assistants
- Team Leads

Professionals involved directly or indirectly in quality, operations, or process improvement initiatives

This certification is designed to equip participants with the knowledge and practical skills needed to drive efficiency, reduce waste, and contribute meaningfully to organizational performance.

## THE CREDENTIALS

The Candidates who are looking to have this certification need a proper training of 40 Professional Training Hours (PTH) from any recognized institute and approved professional trainers of IMRTC. After passing the certification examination, the candidates can use the credentials AI CERTIFIED LEAN SIX SIGMA GREEN – AI CLSSGB with their names.

## PRE-REQUISITE:

To enroll in the AI-CLSSGB program, candidates must have:

- A Bachelor's degree, high school professional diploma, associate degree, or global equivalent
- At least one year of professional experience in Quality, Manufacturing, or any Service Industry

JOIN NOW

## PROFESSIONAL BENEFITS OF PROGRAM

An **AI Certified Lean Six Sigma Green Belt (AI CLSSGB)** is a valuable credential that demonstrates expertise in improving problem solving and analytical skills, ability to lead process improvement project, increases cross industry applicability, reducing waste, and driving quality improvements and improved organizational impacts. Here are the key benefits of earning this certification:

### 1. Career Advancement

- An AI-CLSSGB certification enhances your resume and makes you a strong candidate for leadership and managerial roles in various industries.
- Employers value professionals who can drive process improvements and manage cross-functional teams effectively.

### 2. Increased Earning Potential

- Certified professionals often earn higher salaries due to their specialized skills and ability to deliver measurable business results.
- A AI-Six Sigma Green Belt certification is often associated with premium roles in organizations.

### 3. Expanded Career Opportunities

- Industries such as manufacturing, healthcare, IT, finance, logistics, and consulting frequently seek Lean Six Sigma Green Belts.
- The certification demonstrates versatility and relevance across sectors.

### 4. Leadership Skills

- Green Belts are trained to lead and mentor teams, fostering leadership qualities essential for project and change management.

### 5. Improved problem solving and analytical skills

- Green Belt professionals learn to apply statistical tools and problem-solving methodologies to identify inefficiencies, improve processes, and reduce variability. This training helps develop strong analytical skills that can be applied to various business scenarios.

## DOMAINS AND TASKS

This document presents the updated structure for the **IMRTC Standard Examination Content**. Based on insights from experienced consultants and key stakeholders, the format has been streamlined to ensure that the IMRTC Examination System is clear, organized, and easy to interpret.

### Domain

A *domain* represents a high-level knowledge area essential for the practice of **AI-CLSSGB**.

### Tasks

*Tasks* are the specific roles, functions, and responsibilities that a Quality Consultant is expected to perform within each domain.

The **AI-CLSSGB course examination** will cover *all tasks* within each domain and will follow the outlined percentage distribution for each domain, provided in the subsequent pages.

## ASSESSMENT OF PROGRAM (ONLINE/PHYSICAL)

The examination may be taken online or physically, based on the candidate's preference; however, online examination is highly recommended.

The exam will cover all domains and topics outlined in the curriculum.  
The passing score is 70%.

Internal assessment marks may be included in the final score through accredited trainers, subject to prior approval from the

### IMRTC EXAMINATION DEPARTMENT

Candidates who do not have access to online facilities may take a paper-based examination. In all other cases, partners are required to arrange proper online examination centers in accordance with IMRTC's examination guidelines.

All assessments will be conducted according to the defined domains and tasks, utilizing IMRTC's standardized online assessment methodology.

### EVALUATION AND GRADING

Candidates will be evaluated through examinations conducted by IMRTC LLC, USA.  
The total marks for the Certification/Diploma are based on 100 points.

A minimum score of **70 out of 100** is required to successfully pass and qualify for certification.

# FEES STRUCTURE

## AI-CERTIFIED LEAN SIX SIGMA GREEN BELT

| S. No | Description                        | Fees    |
|-------|------------------------------------|---------|
| 1.    | Membership Fee                     | USD 30  |
| 2.    | Examination Fee<br>For Non Members | USD 300 |
| 3.    | Examination Fee<br>For Non Members | USD 475 |

# PROCESS OF CERTIFICATION

To qualify for the **AI-CLSSGB Certification**, candidates must complete **40 Professional Training Hours (PTH)** from an approved professional trainer or IMRTC partner. Candidates are required to submit proof of completed PTH along with the Examination Application Form, including all required academic and experience documents.

The certification exam consists of 80 multiple-choice questions (MCQs), and candidates must achieve a minimum score of 70% to pass. If a project component is included in the exam, marks will be distributed according to the respective course and certification requirements.

## TERMS & CONDITIONS RELATED TO EXAMINATION AND CERTIFICATION

- ✓ **Validity of Training:** The 40 Professional Training Hours (PTH) are valid for one year from the date of completion.
- ✓ **Re-Attempt on Failure:** If a candidate fails the examination, they are allowed **one additional attempt within the same year**. If the candidate does not pass on the second attempt, they must pay the examination fee again to reappear.
- ✓ **Examination after One Year:** Candidates who wish to appear for the examination after one year from their training completion must resubmit the 40 PTH to be eligible.
- ✓ **Online Examination:** The examination is primarily online, and candidates can schedule it at their convenience.
- ✓ **Paper-Based Examination:** In countries or regions where online examination is not available and as per registered partner/trainer/institute will, candidates may take a **paper-based examination**, which should be submitted to the authorized partner, trainer, or examiner. The assessment period will be one month, after which results will be sent to the concerned partner.
- ✓ **Issuance of Certificate:** Candidates will receive their certificate within one month after successfully passing the examination, and the administration will send it to the concerned partner or training center.
- ✓ **Annual Membership Renewal:** To maintain the worth and eligibility in the market the candidate must renew their membership on a yearly basis and submit their 60 PTH as continue professional education
